# Install Adobe Acrobat Reader DC | Mac OS

Search Adobe Support

**Windows users:** If you are on a Windows computer, see [Install Adobe Acrobat Reader DC | Windows](#).

Installing Adobe Acrobat Reader DC is a two-step process. First you download the installation package, and then you install Acrobat Reader DC from that package file. You do not have to remove the older version of Reader before installing Acrobat Reader DC.

## System requirements

Before you install, always make sure that your system meets the [minimum system requirements](#).

## Installing Reader on older operating systems

You need Mac OS X 10.9 or later to run Acrobat Reader DC. If your operating system is older, you can install an earlier version of Reader. For step-by-step instructions, see [Install an older version of Adobe Reader on Mac OS](#).

**Note:**

Not sure which version of Mac OS you have? Click the Apple icon in the upper-left corner of your screen, then choose **About This Mac**.
